Men Core Color

AW 17 - 18

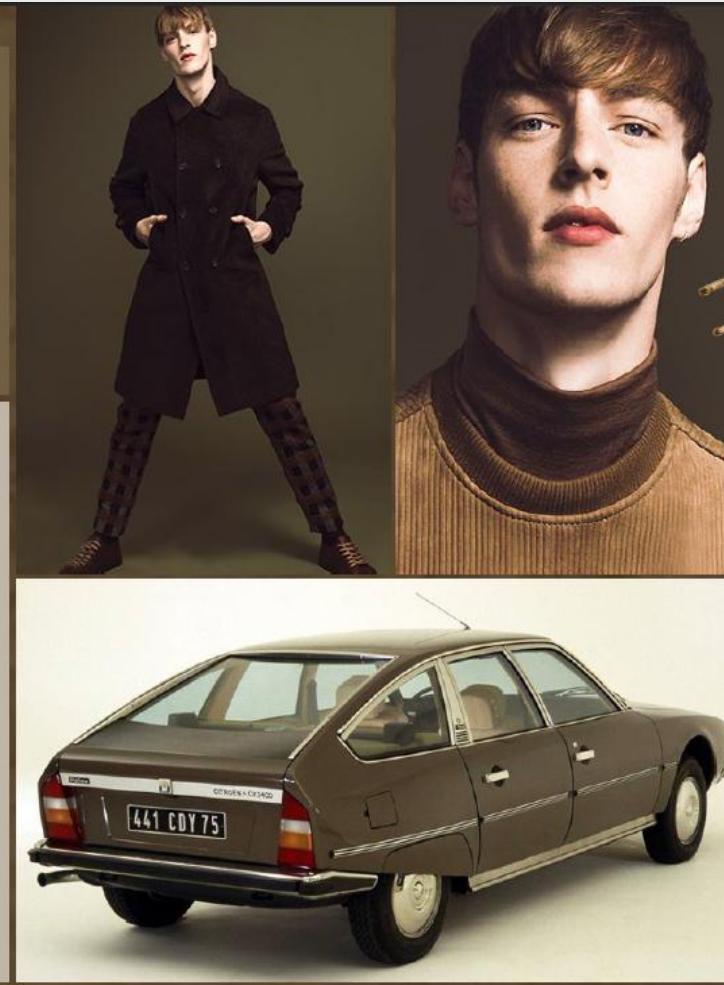

ACCESSORIES & FOOTWEAR CORE COLOUR A/W 17/18

MEN CORE COLOUR

Browns and reddish tones have a strong presence among men's core colours this season. Sand moves on from last winter's sandstone, and is especially relevant for knits and shearlings, while opulent tones such as dark ruby and red adobe indicate a new appetite for winter brights. Grey remains prominent for the men's market, while black and navy are reclaimed as fashion colours, particularly for modern and youthful items.

Olive Khaki

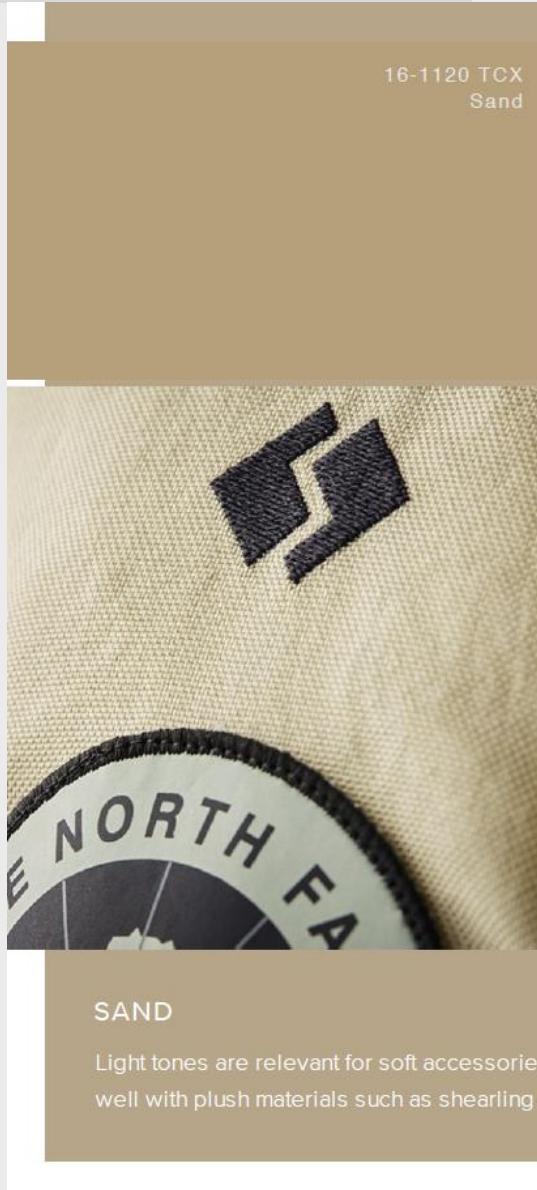

OLIVE KHAKI

Dark khaki works well as a neutral, particularly for soft accessories and textured surfaces, and offers a fashion-forward alternative to classic browns, with its military undertones and utilitarian sensibility.
